

6/7/26

TASK 1

Identify the list of variables and their datatypes for the following. 1. Bill of amazon order 2. A train or bus ticket 3. Current bill 4. Gas bill.

Amazon order bill

variable	Datatype
order number	long long int
order data	string
invoice number	string
customer name	string
seller name	string
product name	string
quantity	int
unit price	double float
tax rate	int
tax amount	double float
total amount	double float
payment mode	string
state code	int
Billing address	string
pan no	string
gst no	string
net amount	float
payment transaction ID	string
Date	string
time	string
invoice value	float
Shopping address	string

2. A train ticket or Bus ticket.

Variable		Datatype
ticket no	→	long 2 int
data	→	string
time	→	string
depot	→	string
route	→	string
from place	→	string
to place	→	string
Passengers	→	int
fare	→	float
total amount	→	float
balance	→	float
conductor ID	→	int
etm ID	→	string
Vehicle no.	→	string
transferable	→	string boolean
kms	→	int
epos no	→	string
govt. subsidy	→	float

3. Current bill

Variable		Datatype
Bill no	→	long string
Service connection no	→	string
unique se no	→	long int
QR code	→	image
consumer name	→	string
Address	→	string
Category	→	int
phase	→	int

Contracted load	→ float
Connected load	→ float
meter number	→ long
multiplication factor	→ float
Present Reading	→ int
Average units	→ int
Billed units	→ int
RMD	→ int
Energy charge	→ float
fixed charge	→ float
customer charge	→ float
ED	→ float
Surcharge	→ float
FPPCA charge	→ float
Government Subsidy	→ float
Bill Amount	→ float
Net bill	→ float
Due date	→ string
Bill date	→ string / Data
Bill time	→ string
Division	→ string
Section	→ string
District	→ string

4. Gas Bill

variable	Datatype
consumer no	→ long long int
customer name	→ string
cylinder price	→ float / double
cgst	→ float / double
sgst	→ float / double
final price	→ float / double
invoice data	→ string
order status	→ string
connection type	→ string
