GATE SYLLABUS FOR DSA

programming and data structures:

- programming basics: programming inc, variables, control flow, functions, recursion.
- Linear data structures: Arrays, Strings, stacks, queues, linked lists.
- Trees: General trees, binary, binary search trees, basic operations.
- Heaps: Binary heaps, priority queues, basic heap operations.
- Graphs: Representation, basic graph theory, concepts.
- Hashing: Hash tables, hash functions, collision handling.

Algorithms

- searching: linear & Binary
- sorting - basic: Bubble, selection & insertion

- Sorting - advanced: merge, quick, heap sort, divide and conquer idea.
- Complexity: Asymptotic worst-case time & space complexity, Big-O, omega, theta
- Algorithm design techniques: Greedy, dynamic programming divide-and-conquer
- Graph algorithms
